

The READY Clinic

Services offered in Cosmos, Montevideo and Pipestone

The READY Clinic offers early intervention ABA therapy.

Applied Behavior Analysis (ABA)

Enhancing the learning and development of young children with autism and related conditions.

Why The READY Clinic?

Autism interferes with a child's interactions, preventing them from learning many cognitive skills. The READY Clinic has the potential to reduce daily demand on educators and district resources, and increase a child's opportunity for mainstream education. We aim to:

- Promote children's independence and participation
- Improve long-term outcomes and quality of life
- Educate, train and support parents and families

Our Trained Staff

Trained in ABA, our staff works to overcome challenges children with autism or a related condition face, using intensive teaching. We work to optimize a child's day by providing developmental, child-specific curriculum in a focused setting.

Research

Research data suggests that early intervention ABA therapy can maximize a child's chance to reduce or eliminate behavior that interferes with learning. Children have a greater chance to catch up to same-age peers and increase quality of life at home, school and in the community with ABA therapy.

Who Qualifies

Children up to 6 years old, diagnosed with autism spectrum disorder or a related condition, may qualify for The READY Clinic.
